East Asia University of Technology

## SUMMARY

---

Aspiring **Full-Stack Software Engineer Intern** with a focus on building scalable and performant web applications. Experienced in **Next.js**, **React.js**, and modern frontend development, combined with solid backend skills using **Node.js** and **Express.js**. Skilled in designing RESTful APIs, integrating databases, and deploying production systems with **Docker** and CI/CD workflows. Passionate about clean code, user-centric design, and collaborating in agile teams to deliver impactful products.

## EDUCATION

---

- **East Asia University of Technology (EAUT)** 2023 – Present  
*Information Technology*

## PROJECTS

---

- **Personal Blog Website — Built with Next.js and Express.js** 06/2025  
*A modern, responsive blog platform to share technical articles and projects.*
  - **Stack:** Next.js (React), Express.js, Node.js, ChakraUI, TypeScript, Markdown/MDX
  - Designed a clean and minimal UI/UX with responsive layouts (desktop, tablet, mobile) and dynamic routing using Next.js.
  - Implemented backend with Express.js for custom API endpoints (comments, likes) and integrated with MongoDB for data persistence.
  - Added support for MDX-based posts, syntax highlighting, SEO optimization, and server-side rendering (SSR) for better performance.
  - Deployed to AWS (S3 + CloudFront) with CI/CD pipeline for automated builds and preview deployments.
  - **GitHub:** [github.com/yourusername/blog-website](https://github.com/yourusername/blog-website)
- **Personal Portfolio — Interactive Developer Website** 05/2025  
*A responsive, dark-themed personal website to showcase projects, resume, and blog posts.*
  - **Stack:** Next.js (React), Node.js/Express.js, ChakraUI, Framer Motion, MDX
  - Designed a clean, minimal, and interactive UI with smooth animations, responsive layouts, and light/dark mode toggle.
  - Built custom pages for About, Works, and Blog with dynamic routing and MDX support for technical articles.
  - Integrated backend APIs (Express.js) for newsletter subscription and contact form handling.
  - Deployed on AWS S3 + CloudFront with custom domain and CI/CD pipeline for automated builds and preview deployments.
  - **Live:** [bunsportfolio.io.vn](https://bunsportfolio.io.vn)

## SKILLS

---

- **Programming:** JavaScript (primary); HTML; CSS.
- **Backend/Infra:** NodeJS; ExpressJS.
- **Frontend:** NextJS; ReactJS; Tailwind CSS.
